Add and Subtract Fractions with Related Denominators

Step 36

Today I am learning to add and subtract fractions with related denominators.

1. Add the Fractions

Add the fractions. Write your answer in simplest form.

a) $\frac{2}{5} + \frac{1}{5} = \square$

b) $\frac{3}{8} + \frac{2}{8} = \square$

c) $\frac{4}{6} + \frac{1}{6} = \square$

d) $\frac{5}{10} + \frac{3}{10} = \square$

2. Subtract the Fractions

Subtract the fractions. Write your answer in simplest form.

a) $\frac{4}{7} - \frac{1}{7} = \square$

b) $\frac{5}{9} - \frac{2}{9} = \square$

c) $\frac{7}{12} - \frac{3}{12} = \square$

d) $\frac{6}{10} - \frac{2}{10} = \square$

3. Solve the Word Problems

Read each problem carefully. Show your working.

a) A pizza is cut into 8 equal slices. Mia eats $\frac{3}{8}$ of the pizza and Sam eats $\frac{2}{8}$.
What fraction of the pizza did they eat altogether?

b) A ribbon is 1 metre long. Ben uses $\frac{3}{10}$ metre and Mia uses $\frac{2}{10}$ metre.
How much of the ribbon did they use altogether?

c) A cake has $\frac{7}{12}$ left. Tom eats $\frac{2}{12}$ of the cake.
What fraction of the cake is left?

d) There are $\frac{9}{10}$ litres of juice in a jug.
$\frac{3}{10}$ litre is poured out.
How much juice is left in the jug?

4. Fill in the Missing Fractions

Find the missing fraction.

a) $\frac{2}{6} + \square = \frac{5}{6}$

b) $\frac{7}{9} - \square = \frac{3}{9}$

c) $\square + \frac{2}{8} = \frac{6}{8}$

d) $\frac{5}{10} - \square = \frac{2}{10}$

My Learning Check

Circle a face.

I can do it! | Almost there! | I need more help. | This was hard.

Parent Observation (optional)

- ☐ Added fractions correctly
- ☐ Subtracted fractions correctly
- ☐ Simplified answers
- ☐ Solved word problems accurately
- ☐ Showed good understanding
- ☐ Neat and organized work
- ☐ Needed support
- ☐ Demonstrated understanding verbally
