MATHEMATICS

Apply calculation to richer practical reasoning

Name: ______________________

Date: ______________________

Step 10

Early Elementary

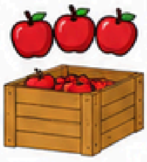
Read each problem carefully. Use efficient strategies to solve.
Show your thinking and explain your answer.

⭐ Today I am learning to apply calculation to richer practical reasoning.

1. Multi-Step Problems

Solve each problem step by step.

a) A farmer picked 324 apples on Monday, 276 on Tuesday, and 189 on Wednesday. He packed them equally into 7 crates. How many apples are in each crate?



Show your work:
Step 1: __________
Step 2: __________
Step 3: __________

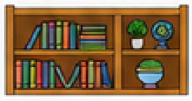
Answer: __________

b) A school ordered 845 notebooks. 235 were given to Grade 2, 178 to Grade 3, and the rest were shared equally among 4 other grades. How many notebooks did each of the other grades get?

Show your work:
Step 1: __________
Step 2: __________
Step 3: __________

Answer: __________

c) A library has 1,256 books. 456 are story books and 318 are science books. The rest are history books. The history books are placed equally on 6 shelves. How many books are on each shelf?



Show your work:
Step 1: __________
Step 2: __________
Step 3: __________

Answer: __________

2. Compare and Reason

Solve the problems. Then compare using >, <, or =.

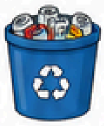
a) A shop sold 432 pens in the morning and 387 in the afternoon. It sold 215 pens the next day. How many pens were sold in all?

Total pens: __________

A shop sold 658 pencils on Monday and 129 on Tuesday. How many pencils were sold in all?

Total pencils: __________

b) A class collected 624 cans for recycling. They gave 285 cans to another class. How many cans are left?



Cans left: __________

Another class collected 718 cans. They gave 346 cans to a charity. How many cans are left?

Cans left: __________

c) A bakery made 560 cookies. It packed them equally into 8 boxes. How many cookies in each box?

Cookies per box: __________

Another bakery made 720 cookies. It packed them equally into 9 boxes. How many cookies in each box?

Cookies per box: __________

3. Data and Decisions

Use the data to answer the questions.

The table shows the number of tickets sold for a school fair.

Day	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Tickets Sold	215	248	236	289	305	412	275

a) On which day were the most tickets sold? __________

b) On which day were the fewest tickets sold? __________

c) How many more tickets were sold on Saturday than on Monday? __________

d) If each ticket cost $2, how much money was collected on Sunday? __________

The table shows how a store sold different items in one week.

Item	T-shirts	Shoes	Hats	Bags
Sold	178	265	142	309

a) Which item was sold the most? __________

b) Which item was sold the least? __________

c) How many more bags were sold than hats? __________

d) If the store wants to sell over 1,000 items next week, how many more items do they need to sell? __________

4. Real-World Challenges

Choose the best strategy and solve.

a) A bus can take 38 passengers. 45 students, 42 parents, and 23 teachers are going on a trip. How many buses are needed?

I will use:
- ☐ Addition and then divide
- ☐ Group and estimate
- ☐ Multiplication
- ☐ Try and check

Show your work:

Answer: __________

b) A family is planning a party.
- 3 pizzas cost $27.
- 2 large bottles of juice cost $8.
- 6 party hats cost $12.

They have $60. How much money will they have left after buying all items?

I will use:
- ☐ Add then subtract
- ☐ Estimate then check
- ☐ Multiplication
- ☐ Use known facts

Show your work:

Answer: __________

c) A garden has 5 rows of flowers. Each row has 18 red flowers and 15 yellow flowers. If 36 flowers are picked, how many flowers are left in the garden?

I will use:
- ☐ Repeated addition
- ☐ Multiplication then subtract
- ☐ Make equal groups
- ☐ Draw a diagram

Show your work:

Answer: __________

5. Your Turn!

Create your own real-life problem for a friend to solve.

My Problem

____

Solve it!
Step 1: __________
Step 2: __________
Step 3: __________
Step 4: __________

Answer: __________

My Learning Check

Circle how confident you feel.

I can do it!

I need more practice.

I need help.

I used...

number sense

mental strategies

written methods

problem solving

reasoning

Today I learned...

1 thing I did well: __________

1 thing I will improve: __________
