MATHEMATICS

MEASUREMENT

Name: ______________________

Date: ______________________

Use fractions, decimals, and conversions in measurement

Step 8

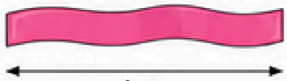
Upper Elementary

Today I am learning to use fractions, decimals, and conversions to solve measurement problems.

1. Fractions of a Measurement

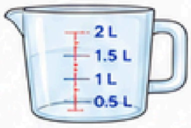
Find the fraction. Write your answer.

a) A ribbon is 1 metre long.
What is $\frac{1}{2}$ of the ribbon?



Answer: ____________ m

b) A bottle holds 2 litres.
What is $\frac{1}{2}$ of the capacity?

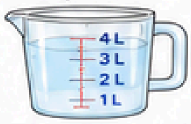


Answer: ____________ L

c) A rope is 8 metres long.
What is $\frac{1}{4}$ of the rope?

Answer: ____________ m

d) A container holds 4 litres.
What is $\frac{3}{4}$ of the capacity?



Answer: ____________ L

2. Write as a Decimal

Write each fraction or mixed number as a decimal.

a) $\frac{1}{2}$ metre = ____________ m

b) $\frac{1}{4}$ litre = ____________ L

c) $\frac{3}{4}$ metre = ____________ m

d) $\frac{1}{2}$ kilogram = ____________ kg

e) $1\frac{1}{2}$ metres = ____________ m

f) $2\frac{1}{2}$ litres = ____________ L

3. Convert the Units

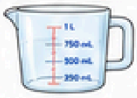
Convert each measurement.

a) 100 cm = ____________ m

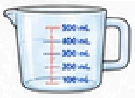
b) 200 cm = ____________ m

c) 150 cm = ____________ m

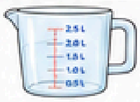
d) 1000 mL = ____________ L



e) 500 mL = ____________ L



f) 2500 mL = ____________ L



4. Which Is Greater?

Circle the larger amount.

a) 0.5 m  or 40 cm 

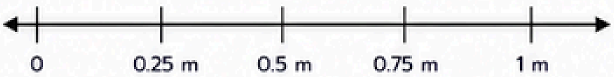
b) 1.5 L  or 1000 mL 

c) $\frac{3}{4}$ m  or 0.5 m 
d) 2.5 L  or 2000 mL 

5. Number Line Measurements

Mark the points on the number line.

0.25 m | 0.5 m | 0.75 m | 1 m



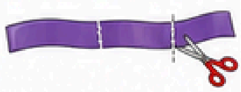
6. Real-Life Measurement Problems

Solve the problems.

a) A water bottle holds 1.5 L.
Sam drinks 0.5 L.
How much remains?

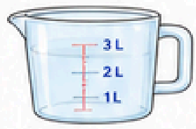
Answer: ____________ L

b) A ribbon is 2 m long.
0.75 m is cut off.
How much remains?



Answer: ____________ m

c) A container holds 3 L.
1.5 L is added.
How much is inside now?



Answer: ____________ L

7. Match the Equivalent Measurements

Draw a line to match.

1. 100 cm	A. 1 m
2. 50 cm	B. 0.5 m
3. 1000 mL	C. 1 L
4. 500 mL	D. 0.5 L
5. 250 cm	E. 2.5 m
6. 2500 mL	F. 2.5 L

8. Think and Explain

Write your answers in the space provided.

a)  Why are decimals useful in measurement? ______________________________

b)  Why do we convert units? ______________________________

c)  Where have you seen fractions used in measurement? ______________________________

I can...

- ☐ use fractions in measurement
- ☐ write fractions as decimals
- ☐ convert between metric units
- ☐ solve real-life measurement problems

Measurement Words

length: metre (m) 

capacity: litre (L)  millilitre (mL) 

time: minute (min) 

Great job!
You are becoming a great measurement thinker!
