

Use part-whole thinking for addition and subtraction

Look at each part-whole model. Write the missing numbers and complete the number sentences.

Step 4

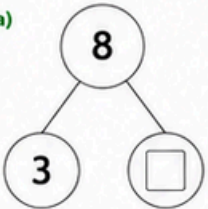

Early Elementary

★ Today I am learning to use part-whole thinking for addition and subtraction.

1. Part-Whole Models (Addition)

Use the part-whole model to complete the addition sentence.

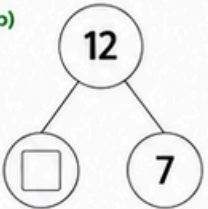

a)

$$3 + \square = 8$$

$$\square + 3 = 8$$

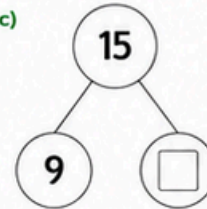

b)

$$\square + 7 = 12$$

$$7 + \square = 12$$

c)

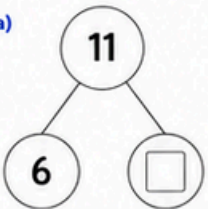

$$9 + \square = 15$$

$$\square + 9 = 15$$

2. Part-Whole Models (Subtraction)

Use the part-whole model to complete the subtraction sentence.

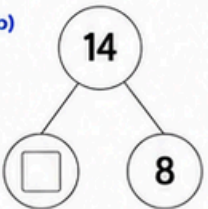

a)

$$11 - 6 = \square$$

$$11 - \square = 6$$

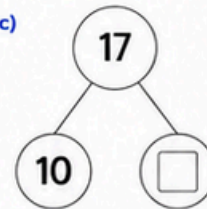

b)

$$14 - 8 = \square$$

$$14 - \square = 8$$

c)

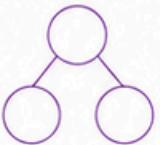

$$17 - 10 = \square$$

$$17 - \square = 10$$

3. Use Part-Whole to Solve

Draw a part-whole model to help you solve. Write the number sentence.

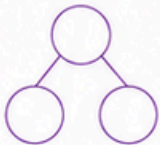

- a) Ben has 5 red cars and 7 blue cars.
How many cars does he have in all?

$$\square + \square = \square$$

He has $\square$ cars in all.

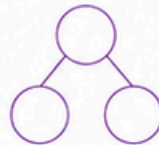

- b) Mia has 14 crayons.
She gives 6 crayons to her friend.
How many crayons does Mia have left?

$$\square - \square = \square$$

She has $\square$ crayons left.

- c) There are 16 students in the class.
8 are girls. The rest are boys.
How many boys are there?

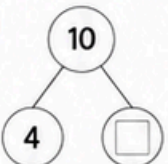

$$\square - \square = \square$$

There are $\square$ boys.

4. Choose the Number

Choose the correct number to complete the part-whole model and the number sentence.

a)

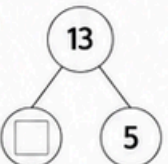

$$4 + \square = 10$$

$$10 - 4 = \square$$

Choose from: 5 6 7 8

b)

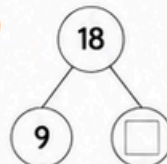

$$\square + 5 = 13$$

$$13 - 5 = \square$$

Choose from: 6 7 8 9

c)

$$9 + \square = 18$$

$$18 - 9 = \square$$

Choose from: 7 8 9 10

My Learning Check

Circle how confident you feel.

I can do it!

I need more practice.

I need help.

I used...

part-whole models

number line

ten frames

counters or cubes

Today I learned...

1 thing I did well: _____

1 thing I will improve: _____
