

Use Angles, Turns, and Orientation Meaningfully

Today I am learning to use angles, turns, and orientation meaningfully.

Step 7

Early Elementary

1. Which Way Is It Facing?

Look at the arrow. Circle the direction.

- a) Left Right Up Down
- b) Left Right Up Down
- c) Left Right Up Down
- d) Left Right Up Down

2. Quarter Turn or Half Turn?

Circle the correct answer.

- a) → Quarter Turn Half Turn
- b) → Quarter Turn Half Turn
- c) → Quarter Turn Half Turn
- d) → Quarter Turn Half Turn

3. Draw the Turn

Draw the new arrow after the turn.

- a) Start: Quarter turn clockwise
- b) Start: Quarter turn anticlockwise
- c) Start: Half turn
- d) Start: Quarter turn clockwise

4. Follow the Robot

- a) The robot starts facing:

Instructions:

- Quarter turn left
- Move forward
- Quarter turn right

Which way is the robot facing now?

- Up
- Down
- Left
- Right

- b) Help the robot follow the path.

Start facing:

- Quarter turn left
- Move forward
- Quarter turn right
- Move forward
- Quarter turn left

Which way is the robot facing?

5. Angle Hunt

Colour the angles as asked.

- a) Right angle
- b) Smaller than a right angle
- c) Larger than a right angle

6. Match the Angle

Draw lines to match.

- Right angle
- Acute angle
- Obtuse angle

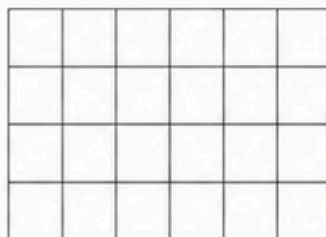

7. Create a Route

Start facing:

Draw a route using:

- one quarter turn
- one half turn
- one forward move

Show the final direction.

8. Think and Talk

- a) What is a turn? _____
- b) Where have you seen right angles? _____
- c) Why do directions matter? _____

I can...

- ☐ identify directions.
- ☐ make turns.
- ☐ recognize angles.
- ☐ follow and create routes.

Turn Reminders

Angle Reminders

Great job!
You are an angle and direction star!
