

Interpret Financial Information Critically

Look closely at financial information. Ask questions, compare and decide what it means.

★ Today I am learning to interpret financial information critically.

Step 10

Lower Elementary
(Grades 3–4)

1. Read the Advertisement

Read the advertisement. Answer the questions.

SUPER SAVINGS SALE!

ONE DAY ONLY!

Saturday 24 May

Sneakers
Regular price: \$80
Now only: \$56

30% OFF

Limited stock. While supplies last.

- How much money do you save?
\$ _____
- What is the sale price?
\$ _____
- If you also have a coupon for \$5 off, how much will you pay?
\$ _____
- Is this a good deal? Why or why not?

2. Compare the Offers

You want to buy a jacket.
Compare the three offers.
Which offer is the best value?
Show your thinking.

Offer A

Price: \$90
• 20% off

20% OFF

Offer B

Price: \$80
\$15 off

Offer C

Price: \$75
Buy one,
get one 50% off

Best value: ☐ Offer A ☐ Offer B ☐ Offer C

Why? _____

3. Read the Table

The table shows how a family spent their money in one month.
Study the table and answer the questions.

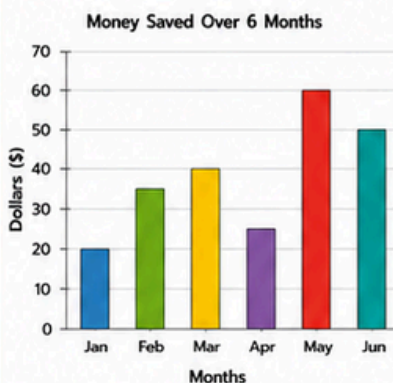

Category	Amount Spent (\$)	Percentage of Total
Housing	1,200	30%
Food	600	15%
Transport	400	10%
Entertainment	300	7.5%
Clothing	250	6.25%
Savings	500	12.5%
Other	750	18.75%
Total	4,000	100%

- How much did the family spend in total?
\$ _____
- Which two categories together make up nearly half of their spending?

- How much more did they spend on Housing than Savings?
\$ _____
- Which category has the smallest percentage?

4. Study the Graph

The bar graph shows how students saved money over 6 months.
Look at the graph and answer the questions.

- In which month did students save the most?

- How much more was saved in May than in January?
\$ _____
- What was the total amount saved in all 6 months?
\$ _____
- In which two months was less than \$30 saved?

5. True or False?

Read each statement about financial information.
Tick True or False. If it is false, write what is wrong.

Statement	True	False	What is wrong?
a) A 50% off sale means you pay half the price.	☐	☐	_____
b) If something costs \$60 and goes up by 10%, the new price is \$66.	☐	☐	_____
c) The highest bar on a graph always means the best choice.	☐	☐	_____
d) The total of the percentages in a table should be 100%.	☐	☐	_____

6. Make a Smart Decision

You have \$100 to spend on a gift. You have these options.
Read the information and decide what to buy. Explain why.

Gift Set

- Original price: \$70
- 10% off sale
- Free gift wrap

Headphones

- Price: \$80
- No sale
- 1-year warranty

Board Game

- Price: \$60
- Buy one,
get one 25% off

Which option is the best choice? _____

Why? _____

My Learning Check

Circle how confident you feel.

I understand this well.

I need more practice.

I need help.

I used...

calculations

☐

graphs

☐

percentages

☐

tables

☐

Today I learned...

One thing I did well: _____

One thing I will improve: _____

Think About It!

Why is it important to look carefully at financial information before making decisions?
