

Compound Words and Base Words

I can use smaller words and base words to understand longer words.

Today I am learning to:

- ☐ join two words to make a compound
- ☐ split a compound into its two words
- ☐ find the base word in a longer word
- ☐ use word parts to help with meaning

1

Learn the Word Parts

A **compound word** joins two whole words. A **base word** is the main word inside a longer word.

sun + set -> sunset

compound word

rain + bow -> rainbow

compound word

play + -ing -> playing

base word = play

2

Build the Compound

Join the two words. Write the compound word.

Word 1	Word 2	Compound word
rain	bow	_____
foot	ball	_____
bed	room	_____
sun	set	_____
cup	cake	_____

3

Find the Base Word

Read the longer word. Write the base word you can see inside it.

playing

base word _____

jumped

base word _____

helpful

base word _____

dogs

base word _____

taller

base word _____

painted

base word _____

4

Read and Notice

Read the passage. Circle the compound words and underline a base word inside a longer word.

After **sunset**, Mia carried her **lunchbox** into the **bedroom**. She had been **playing** near the **playground** and had **jumped** over puddles after the rain. On her shelf was a bright **rainbow** picture and a small **starfish** model. Finding smaller words inside longer words helped her read them.

Word detective: Choose one compound word. Write its two smaller words: _____ + _____

5

Sort the Words

Sort each word by how it was built.

sunset

playing

football

dogs

bedroom

jumped

rainbow

taller

Two whole words

Base word + ending

★ Challenge!

Build: play + ground = _____ rain + coat = _____

You did it!

I can find useful word parts!
