

Extend Place Value to Decimals

Step 33

Today I am learning to extend place value to decimals.

1. Read the Decimal

Write the decimal shown in each place value chart.

a)

Ones	Tenths	Hundredths
3	4	2

b)

Ones	Tenths	Hundredths
7	0	5

c)

Ones	Tenths	Hundredths
0	8	6

d)

Ones	Tenths	Hundredths
5	1	0

2. Partition the Decimal

Complete each number sentence using place value.

a) 4.36 = ones + tenths + hundredths

b) 8.07 = ones + tenths + hundredths

c) 0.54 = ones + tenths + hundredths

d) 6.20 = ones + tenths + hundredths

3. Compare and Order

Use <, > or = to compare each pair. Then order all the decimals from smallest to largest.

a) 3.4 3.40

b) 5.09 5.9

c) 0.7 0.67

d) 8.25 8.205

Order all the decimals from smallest to largest:

4. Solve the Problems

Read the problems. Use place value to help you. Write the answer.

a) Mia poured 3.5 litres of juice. Then she poured 0.4 litres more.
How much juice did she pour altogether?

b) A ribbon is 6.8 metres long. Sam cuts off 1.3 metres.
How much ribbon is left?

c) A toy costs \$4.25. Ben has \$5.00.
How much more money does he have than the cost of the toy?

d) A jar has 2.6 kg of flour. Another 0.2 kg is added.
How much flour is in the jar now?

My Learning Check

Circle a face.

I can do it!

Almost there!

I needed help.

This was hard.

Parent Observation (optional)

- ☐ Read decimals in place value charts
- ☐ Partitioned decimals into ones, tenths and hundredths
- ☐ Compared decimals correctly

- ☐ Solved decimal problems accurately
- ☐ Needed support
- ☐ Demonstrated understanding verbally

Note: _____
