## Round and Estimate with Larger Numbers

Name: \_\_\_\_\_

Date: \_\_\_\_\_

**Step 32**

★ Today I am learning to round and estimate with larger numbers.

**1. Round to the Nearest 10, 100, 1,000 and 10,000** Round each number to the place value shown.

| Number       | Nearest 10 | Nearest 100 | Nearest 1,000 | Nearest 10,000 |
|--------------|------------|-------------|---------------|----------------|
| a. 54,782    |            |             |               |                |
| b. 168,934   |            |             |               |                |
| c. 745,309   |            |             |               |                |
| d. 2,671,453 |            |             |               |                |
| e. 9,876,321 |            |             |               |                |

**2. Round to the Nearest 100,000 and 1,000,000** Round each number to the place value shown.

| Number       | Nearest 100,000 | Nearest 1,000,000 |
|--------------|-----------------|-------------------|
| a. 358,742   |                 |                   |
| b. 673,518   |                 |                   |
| c. 1,248,657 |                 |                   |
| d. 2,856,394 |                 |                   |
| e. 7,431,908 |                 |                   |

### Rounding Tip

Look at the digit to the right of the place value you are rounding to.

0, 1, 2, 3, 4 → round down

5, 6, 7, 8, 9 → round up

**3. Estimate** Estimate the answer to each calculation by rounding to the nearest 1,000.

|                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                               |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>a. <math>4,782 + 2,369</math></p> <p>Estimate:</p> <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> + <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> = _____ | <p>b. <math>12,675 - 4,389</math></p> <p>Estimate:</p> <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> - <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> = _____ | <p>c. <math>8,542 \times 3</math></p> <p>Estimate:</p> <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> × <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> = _____ | <p>d. <math>24,657 \div 4</math></p> <p>Estimate:</p> <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> ÷ <div style="border: 1px solid black; width: 60px; height: 30px; display: inline-block;"></div> = _____ |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**4. Which is the Best Estimate?** Circle the estimate that is closest to the actual answer.

- |                                                                                                                           |                                                                                                                         |
|---------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <p>a. <math>6,793 + 2,215 =</math> _____ (actual answer)</p> <p>i. 10,000    ii. 11,000    iii. 12,000    iv. 13,000</p>  | <p>b. <math>15,872 - 6,429 =</math> _____ (actual answer)</p> <p>i. 8,000    ii. 9,000    iii. 10,000    iv. 11,000</p> |
| <p>c. <math>2,984 \times 5 =</math> _____ (actual answer)</p> <p>i. 10,000    ii. 12,000    iii. 14,000    iv. 16,000</p> | <p>d. <math>38,765 \div 6 =</math> _____ (actual answer)</p> <p>i. 5,000    ii. 6,000    iii. 7,000    iv. 8,000</p>    |

**5. Word Problems** Round or estimate to help you solve each problem.

- a. A stadium can hold 24,682 people on the lower level and 17,839 people on the upper level. About how many people can the stadium hold in total?

Show your estimate.

Answer: \_\_\_\_\_

- b. A school raised \$48,765 in the spring and \$37,892 in the autumn for charity. About how much money did they raise altogether?

Show your estimate.

Answer: \_\_\_\_\_

**6. Challenge** Fill in the blanks to make each statement true.

- |                                                             |                                                               |                                                                  |                                                                    |
|-------------------------------------------------------------|---------------------------------------------------------------|------------------------------------------------------------------|--------------------------------------------------------------------|
| a. The number 67,498 rounded to the nearest 1,000 is _____. | b. The number 349,872 rounded to the nearest 10,000 is _____. | c. The number 2,586,743 rounded to the nearest 100,000 is _____. | d. The number 9,876,543 rounded to the nearest 1,000,000 is _____. |
|-------------------------------------------------------------|---------------------------------------------------------------|------------------------------------------------------------------|--------------------------------------------------------------------|

### My Learning Check

Circle a face.

I can do it!

Almost there!

I need more help.

This was hard.

### Parent Observation (optional)

- ☐ Rounded correctly to 10, 100, 1,000, 10,000
- ☐ Rounded correctly to 100,000, 1,000,000
- ☐ Estimated calculations appropriately

- ☐ Solved word problems using estimation
- ☐ Worked independently
- ☐ Needed support

Notes: \_\_\_\_\_
