

Visualise and Build Shapes in Two and Three Dimensions

Step 8

Upper Elementary

Today I am learning to visualise and build shapes in two and three dimensions.

1. 2D or 3D?

Circle the correct answer.

Shape	2D	3D
Square	☐	☐
Cube	☐	☐
Circle	☐	☐
Sphere	☐	☐
Rectangle	☐	☐
Cylinder	☐	☐

2. Match the Shape

Draw lines to match.

2D Shapes	3D Objects
Circle	Ball
Square	Box
Rectangle	Can
Triangle	Party Hat

3. Count Faces, Edges and Corners

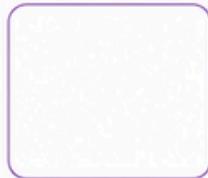

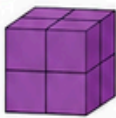

Write how many.

Shape	Faces	Edges	Corners
Cube	_____	_____	_____
Rectangular Prism	_____	_____	_____
Pyramid	_____	_____	_____

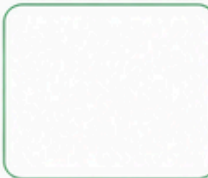

4. Build the Shape

Use cubes. Build the shapes and draw them.

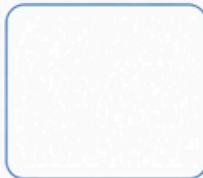

a) Build a cube.

b) Build a rectangular prism.

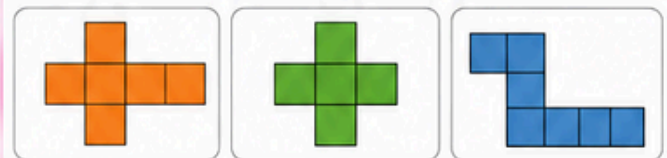

c) Build a tower using 6 cubes.

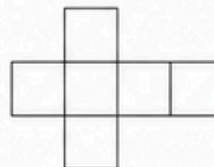

5. Nets and Folding

a) Which net makes a cube? Circle the correct net.

b) Trace the faces that will become the top and bottom.

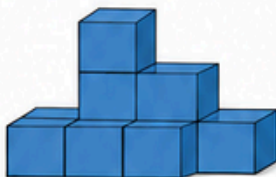

Top face:

Bottom face:

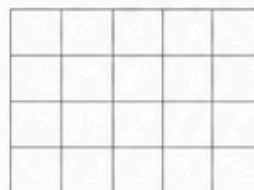

6. View From Different Directions

Look at the block structure.

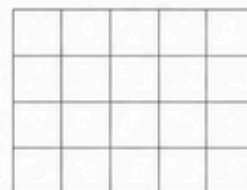

Draw the views on the grids.

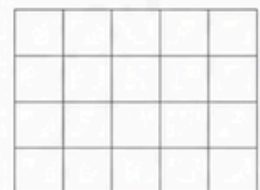

Front View

Side View

Top View

7. Design Challenge

Build a playground structure.

Rules:

- Use at least 3 different shapes.
- Include one 3D object.
- Label the shapes used.

Shapes you can use:

8. Think and Explain

- What is the difference between a 2D shape and a 3D shape?

- Which 3D shape do you see most often?

- Why are 3D shapes important in building and design?

I can...

- ☐ identify 2D and 3D shapes.
- ☐ count faces, edges and corners.
- ☐ use nets to build 3D shapes.
- ☐ draw views from different directions.
- ☐ design and build with shapes.

Shape Words

3D Shape Names

Great job!

You are a shape builder and designer!
