

Refine Spatial Judgement and Explanation

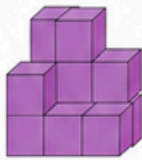

Today I am learning to refine my spatial judgement and explain my thinking clearly.

Step 12

Upper Elementary

1. Visualise and Describe

Look at the 3D object.

a) Draw the front, side and top views.

Front View

Side View

Top View

b) Describe the 3D object using position words.

Example: The top cube is on the middle.

3. Compare and Justify

Two classmates designed a bedroom layout on the grid.

Design A

Design B

a) Which design do you think is better? Circle your choice.

Design A or Design B

b) Explain your choice using at least two reasons.

5. Real-Life Spatial Judgement

Look at the room below.

a) Where would be the best place to put a lamp? Explain.

b) Where would be a good place to put a bookshelf? Explain.

c) What change would make the room easier to move around in? Explain.

7. Design and Evaluate

Design a small park on the grid.

Include:

Pond

Playground

Trees

Walking Path

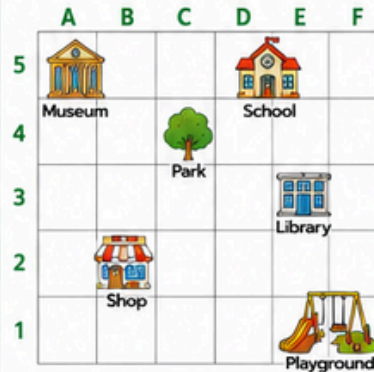

a) Label all features.

b) Explain how your design meets the needs of different people.

c) What improvement would you make and why?

2. Map Analysis and Explanation

Use the map to answer the questions. Explain your thinking.

a) What is north of the shop? Explain.

b) What is east of the park? Explain.

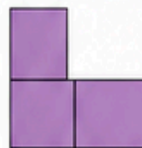

c) What is the best place to go from the library to the playground? Explain why.

d) If you are at the museum (A5), how would you get to the playground (F1)? Describe the route.

4. Rotate and Predict

The shape is turned.

Original Shape

a) Quarter turn clockwise

b) Half turn

c) Quarter turn anticlockwise

d) Describe what happened to the shape each time.

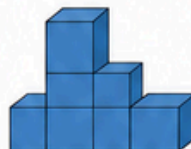

a) _____

b) _____

c) _____

6. Build, Draw and Explain

A block structure is built using cubes.

a) Draw the front, side and top views.

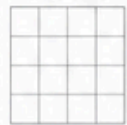

Front View

Side View

Top View

b) Explain how you worked out each view.

8. Think and Reflect

a) What does good spatial judgement mean in real life?

b) Why is it important to explain your spatial thinking?

c) How can refining your spatial judgement help you solve problems and make better decisions?

I can...

- ☐ visualise and describe 3D objects.
- ☐ analyse maps and layouts.
- ☐ evaluate and justify spatial decisions.
- ☐ explain my thinking clearly.

Position Words

above

below

beside

between

In front

behind

Great job!
You are building strong spatial thinking skills!
