

Use Double, Half, and Same Amount in Practical Play

Step 2

Kindergarten – Early
Elementary (Grades K–2)

Today I am learning to use double, half,
and same amount in practical play.

1. Same Amount

Look at the pictures. Tick (✓) the pair that has the same amount.

- | | | | |
|----|--|--|--------------------------|
| a) | | | ☐ |
| b) | | | ☐ |
| c) | | | ☐ |
| d) | | | ☐ |

2. Double

Draw to show double the amount.

- | | | | |
|----|--|---------------|----------------------|
| a) | | → double is → | <input type="text"/> |
| b) | | → double is → | <input type="text"/> |
| c) | | → double is → | <input type="text"/> |
| d) | | → double is → | <input type="text"/> |

3. Half

Cross out to show half the amount.

- | | | | |
|----|--|---------|----------------------|
| a) | | half is | <input type="text"/> |
| b) | | half is | <input type="text"/> |
| c) | | half is | <input type="text"/> |
| d) | | half is | <input type="text"/> |

4. Double, Half, or Same?

Look at each pair. Circle if it is double, half, or the same amount.

- | | | | | | |
|----|--|--|--------|------|------|
| a) | | | double | half | same |
| b) | | | double | half | same |
| c) | | | double | half | same |
| d) | | | double | half | same |
| e) | | | double | half | same |

5. Practical Play – Let's Share!

Look at the groups and answer the questions.

- a) Mia has 6 crackers. She shares them equally with her friend. How many crackers does each friend get?
-
-
- b) Ben has 4 toy cars. He gives half to his brother. How many cars does each have?
-
-
- c) Lina has 3 stickers. She buys double that amount. How many stickers does she have now?
-
- double →

6. Real-Life Fun

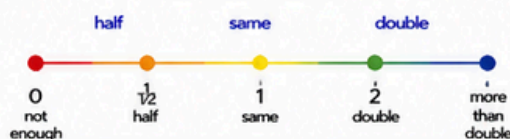

Use double, half, or same to solve each problem.

- a) There are 5 crayons in a box. Another box has double that amount. How many crayons are in the second box?
-
-
- b) Sam has 10 grapes. He eats half. How many grapes does he have left?
-
-
- c) There are 7 books on a shelf. Another shelf has the same amount. How many books are on the second shelf?
-
-

I can...

- ☐ use the words double, half, and same.
- ☐ compare groups.
- ☐ solve problems about sharing.
- ☐ explain my thinking.

Chance Words

Great job!

You are using math words to compare, share, and be fair!
