

Multiply and Divide Using Arrays, Grouping and Known Facts

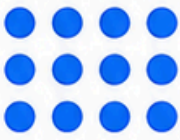

Step 27

★ Today I am learning to multiply and divide using arrays, grouping and known facts.

1. Arrays

Write a multiplication sentence for each array. Then write the total.

a.

$$\square \times \square = \square$$

Total = _____

b.

$$\square \times \square = \square$$

Total = _____

c.

$$\square \times \square = \square$$

Total = _____

d.

$$\square \times \square = \square$$

Total = _____

2. Grouping

Write a multiplication sentence for each group. Then write the total.

a.

$$\square \times \square = \square$$

Total = _____

b.

$$\square \times \square = \square$$

Total = _____

c.

$$\square \times \square = \square$$

Total = _____

d.

$$\square \times \square = \square$$

Total = _____

3. Use Known Facts

Use the known fact to help you write the missing number.

a. $3 \times 4 = 12$

$$12 \div 3 = \square$$

$$12 \div 4 = \square$$

b. $5 \times 2 = 10$

$$10 \div 5 = \square$$

$$10 \div 2 = \square$$

c. $4 \times 6 = 24$

$$24 \div 4 = \square$$

$$24 \div 6 = \square$$

d. $2 \times 7 = 14$

$$14 \div 2 = \square$$

$$14 \div 7 = \square$$

e. $3 \times 8 = 24$

$$24 \div 3 = \square$$

$$24 \div 8 = \square$$

f. $5 \times 3 = 15$

$$15 \div 5 = \square$$

$$15 \div 3 = \square$$

4. Multiply or Divide

Solve the following. Show your thinking using arrays or groups if you need to.

a. $4 \times 3 = \square$

b. $6 \times 2 = \square$

c. $3 \times 5 = \square$

d. $2 \times 9 = \square$

e. $20 \div 4 = \square$

f. $18 \div 3 = \square$

g. $12 \div 2 = \square$

h. $15 \div 5 = \square$

5. Solve the Problems

Read each problem carefully. Write a multiplication or division sentence and the answer.

a. There are 4 rows of chairs.
Each row has 6 chairs.
How many chairs are there?

$$\square \times \square = \square$$

Answer: _____

b. Max has 24 stickers.
He sticks them equally into 4 pages.
How many stickers are on each page?

$$\square \div \square = \square$$

Answer: _____

c. There are 3 boxes.
Each box has 9 pencils.
How many pencils are there?

$$\square \times \square = \square$$

Answer: _____

d. There are 16 apples.
They are shared equally
among 2 baskets.
How many apples are in
each basket?

$$\square \div \square = \square$$

Answer: _____

My Learning Check

Circle a face.

I can do it!

Almost there!

I needed help.

This was hard.

Parent Observation (optional)

- ☐ Understood arrays
- ☐ Understood grouping
- ☐ Used known facts

- ☐ Solved multiplication and division
- ☐ Explained thinking clearly
- ☐ Needed support

Notes: _____
