

Use counting strategies and known facts more efficiently

Use different strategies to solve problems. Choose the most efficient way you know.

Step 3

Early Elementary

★ Today I am learning to use counting strategies and known facts more efficiently.

1. Count On or Count Back

Use the number line to help. Write the answer.

a) Count on to add.

$$5 + 3 = \underline{\quad}$$

b) Count on to add.

$$8 + 4 = \underline{\quad}$$

c) Count back to subtract.

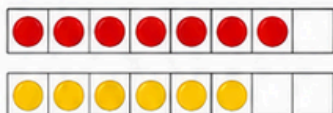

$$13 - 4 = \underline{\quad}$$

2. Make 10

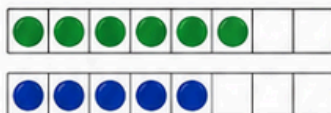

Use the Make 10 strategy to help you. Write the answer.

a) $7 + 6 = \underline{\quad}$

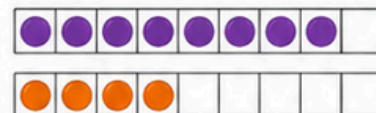

$$7 + 6 = 7 + 3 + 3 = 10 + 3 = \underline{\quad}$$

b) $8 + 5 = \underline{\quad}$

$$8 + 5 = 8 + \underline{\quad} + \underline{\quad} = 10 + \underline{\quad} = \underline{\quad}$$

c) $9 + 4 = \underline{\quad}$

$$9 + 4 = 9 + \underline{\quad} = 10 + \underline{\quad} = \underline{\quad}$$

3. Use Known Facts

Use a known fact to help you. Write the answer.

a) $6 + 7 = \underline{\quad}$

I know $6 + 6 = 12$.

So, $6 + 7 = \underline{\quad}$.

b) $7 + 8 = \underline{\quad}$

I know $7 + 7 = 14$.

So, $7 + 8 = \underline{\quad}$.

c) $8 - 5 = \underline{\quad}$

I know $8 - 4 = 4$.

So, $8 - 5 = \underline{\quad}$.

d) $12 - 7 = \underline{\quad}$

I know $12 - 6 = 6$.

So, $12 - 7 = \underline{\quad}$.

e) $9 + 2 = \underline{\quad}$

I know $9 + 1 = 10$.

So, $9 + 2 = \underline{\quad}$.

4. Choose the Most Efficient Strategy

Look at each problem. Write the strategy you would use and solve.

a) $6 + 5 = \underline{\quad}$

Strategy I will use:

☐ Count on ☐ Make 10 ☐ Known facts

Show or write your thinking.

b) $14 - 6 = \underline{\quad}$

Strategy I will use:

☐ Count back ☐ Make 10 ☐ Known facts

Show or write your thinking.

c) $8 + 7 = \underline{\quad}$

Strategy I will use:

☐ Count on ☐ Make 10 ☐ Known facts

Show or write your thinking.

5. Solve Simple Problems

Read each story. Choose a strategy and solve.

a) Sam has 7 stickers.

He gets 5 more stickers.

How many stickers does Sam have now?

My strategy: _____

b) Mia has 13 beads.

She gives 4 beads to her friend.

How many beads does Mia have left?

My strategy: _____

c) There are 9 birds on a tree.

7 more birds fly to the tree.

How many birds are on the tree now?

My strategy: _____

My Learning Check

Circle how confident you feel.

I can do it!

I need more practice.

I need help.

I used...

counting on or back

make 10

known facts

Today I learned...

1 thing I did well: _____

1 thing I will improve: _____
