

Estimate and Check Reasonableness

Step 28

★ Today I am learning to estimate and check if answers are reasonable.

1. Estimate

Estimate the answer by rounding to the nearest 10 or 100. Then solve the problem.

a. $38 + 46$

Estimate:

$40 + 50 = \boxed{}$

Exact answer:

$38 + 46 = \boxed{}$

Is my answer reasonable?

Yes / No

b. $157 + 268$

Estimate:

$200 + 300 = \boxed{}$

Exact answer:

$157 + 268 = \boxed{}$

Is my answer reasonable?

Yes / No

c. $492 - 198$

Estimate:

$500 - 200 = \boxed{}$

Exact answer:

$492 - 198 = \boxed{}$

Is my answer reasonable?

Yes / No

d. $631 - 287$

Estimate:

$600 - 300 = \boxed{}$

Exact answer:

$631 - 287 = \boxed{}$

Is my answer reasonable?

Yes / No

2. Choose the Reasonable Answer

Which answer is the most reasonable? Tick (✓) the best choice.

a. $24 + 38 = ?$

Estimate: $20 + 40 = 60$

Which answer is most reasonable?

- ☐ 52
☐ 62
☐ 82

b. $143 + 279 = ?$

Estimate: $100 + 300 = 400$

Which answer is most reasonable?

- ☐ 322
☐ 422
☐ 622

c. $712 - 298 = ?$

Estimate: $700 - 300 = 400$

Which answer is most reasonable?

- ☐ 314
☐ 414
☐ 614

d. $526 - 173 = ?$

Estimate: $500 - 200 = 300$

Which answer is most reasonable?

- ☐ 253
☐ 353
☐ 453

3. Check the Reasonableness

Solve the problem. Then decide if the answer is reasonable. Explain your thinking.

- a. There are 48 pencils in a box. Tom buys 3 boxes.
How many pencils does he have?

Estimate:

Exact answer:

Is my answer reasonable? Yes / No

Explain: _____

- b. A library has 386 story books. It buys 235 more.
How many story books does it have now?

Estimate:

Exact answer:

Is my answer reasonable? Yes / No

Explain: _____

4. Solve the Problems

Estimate first. Solve the problem. Then check if your answer is reasonable.

a. $63 + 29$

Estimate:

Exact answer:

Reasonable? Yes / No

b. $241 + 158$

Estimate:

Exact answer:

Reasonable? Yes / No

c. $728 - 316$

Estimate:

Exact answer:

Reasonable? Yes / No

d. $905 - 482$

Estimate:

Exact answer:

Reasonable? Yes / No

5. Real Life Problem

Estimate and solve. Then check if your answer is reasonable.

A supermarket has 278 packets of rice.
It sells 139 packets in one day.
How many packets of rice are left?

Estimate:

Exact answer:

Is my answer reasonable? Yes / No

Explain your thinking: _____

My Learning Check

Circle a face.

I can do it!

Almost there!

I needed help.

This was hard.

Parent Observation (optional)

- ☐ Estimated using rounding
☐ Checked if answers are reasonable
☐ Explained thinking clearly
☐ Solved problems accurately
☐ Needed support

Notes: _____
