

Choose Useful Ways to Organise and Display Data

SDA EE Step 5

★ I can choose the best way to organise and show information.

1 Let's Look

Here is some information. We want to find out what fruit the class likes.

The class were asked: "What is your favourite fruit?"

Talk About It

- Can we show this information in different ways?
- Which way is easiest to read?
- Which way helps us answer questions best?

2 Let's Try

The same information is shown in three different ways. Look at each display and answer the questions.

A. Tally Chart

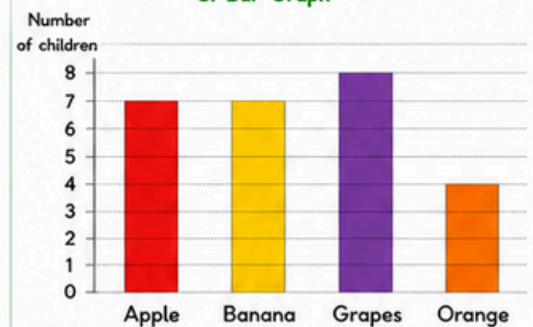

Fruit	Tally
Apple	
Banana	
Grapes	
Orange	

B. Picture Graph

Key:  = 1 child

C. Bar Graph

- Which fruit is the most popular? _____
- Which fruit is the least popular? _____
- How many children like bananas? _____
- How many children like grapes? _____
- Which display (A, B or C) do you think is easiest to read? _____
- Which display would be best if we wanted to compare quickly? _____

3 Let's Do

Look at the data below. Choose the most useful way to display it.

Class survey:
"What is your favourite ice cream flavour?"

-  Chocolate
-  Strawberry
-  Vanilla
-  Mint

- Choose the best way to display this data.

Tick (✓) your choice.

Tally chart ☐ Picture graph ☐ Bar graph ☐

- Draw your display in the box below.

- Answer: Which flavour is the most popular? _____
Which flavour is the least popular? _____

4 Challenge

Think and answer.

- We counted the types of books in the class library.

Book type	Number
Story books	12
Information books	8
Poetry books	4
Comics	10

- Which display would be most useful if we want to:

- show exact numbers? _____
- see which type is the most? _____
- compare the types quickly? _____
- show the data to a younger class? _____

- Draw your chosen display.

My Learning Check

How did I go today?

I can do it!

Almost there!

I need more help.

This was hard.

Circle a face.

Parent Observation (optional)

Tick what you saw today.

- ☐ Chose and used a useful way to organise data
- ☐ Explained why one display was more useful than another
- ☐ Read and compared simple data displays
- ☐ Answered questions using the data
- ☐ Needed support

Notes: _____
