

Describe Shape Features and Simple Symmetry

Step 3

Kindergarten /
Early Elementary

Today I am learning to describe the features of shapes
and find simple symmetry.

1. Count the Sides

Look at each shape.
Write the number of sides.

- a)  Sides = _____
- b)  Sides = _____
- c)  Sides = _____
- d)  Sides = _____

2. Count the Corners

Look at each shape.
Write the number of corners.

- a)  Corners = _____
- b)  Corners = _____
- c)  Corners = _____
- d)  Corners = _____

3. Match the Shape Description

Draw a line to match each shape
to the correct description.

- | | | | | |
|---|-----------|---|---|-----------------------------------|
|  | Triangle | • | • | No corners |
|  | Square | • | • | 3 sides |
|  | Rectangle | • | • | 4 equal sides |
|  | Circle | • | • | 2 long sides
and 2 short sides |

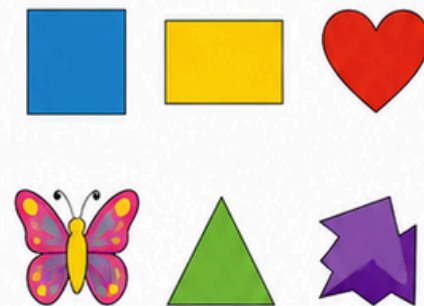

4. Same Shape or Different?

Look at each pair.
Circle: **Same** **Different**

- a)   Same Different
- b)   Same Different
- c)   Same Different
- d)   Same Different

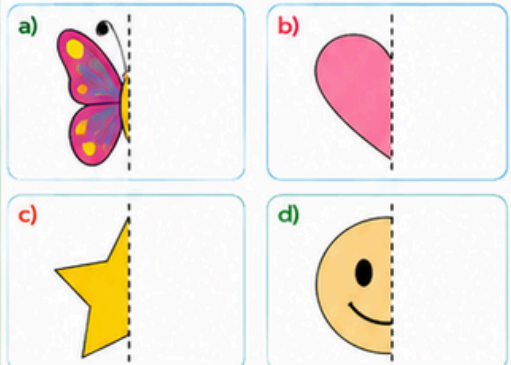

5. Symmetry Hunt

Circle the shapes that are symmetrical.

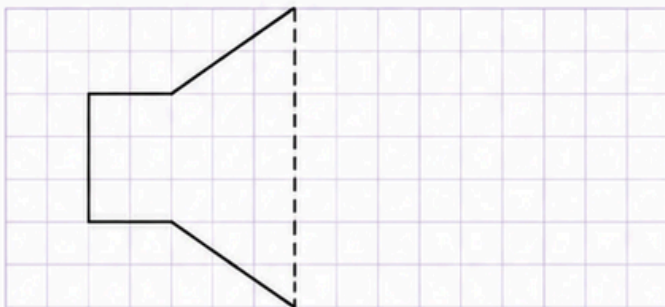

6. Complete the Symmetrical Picture

Draw the missing half of each picture.

7. Draw Your Own Symmetrical Shape

Draw the other half to make your shape symmetrical.

8. Think and Talk

a) What is symmetry?

b) Which shape has no corners?

c) Where have you seen symmetry?

I can...

- ☐ count sides and corners.
- ☐ describe and compare shapes.
- ☐ identify and complete simple symmetry.

Shape Words

Great job!

You are becoming
a shape detective!
Keep exploring!
