

Use Percentages and Comparisons in Shopping Decisions

Step 7

Upper Elementary

Today I am learning to use percentages and comparisons to make smart shopping decisions.

1. Calculate the Percentage

What percentage of the original price is the sale price? Show your working.

- a) Original \$80 Sale \$60 _____ %
- b) Original \$50 Sale \$35 _____ %
- c) Original \$120 Sale \$90 _____ %
- d) Original \$70 Sale \$49 _____ %

2. Find the Discount

Find the discount amount and the discount percentage. Show your working.

- | | Original | Sale | Discount Amount | Discount Percentage |
|----|----------|-------|-----------------|---------------------|
| a) | \$150 | \$120 | \$ _____ | _____ % |
| b) | \$200 | \$160 | \$ _____ | _____ % |
| c) | \$450 | \$315 | \$ _____ | _____ % |
| d) | \$320 | \$256 | \$ _____ | _____ % |

3. Compare the Best Deal

Which offer is the better deal? Tick (✓) your choice and explain why.

- a) **Store A** 20% OFF all items or **Store B** \$15 OFF when you spend \$80 or more

Best deal: Store A ☐ Store B ☐

Why? _____

- b) **Store C** Buy 2, get 25% OFF or **Store D** 30% OFF one item

Best deal: Store C ☐ Store D ☐

Why? _____

4. Work Out the Sale Price

Calculate the sale price after the discount.

- a) 30% OFF an item priced at \$140
Sale price = \$ _____
- b) 15% OFF an item priced at \$80
Sale price = \$ _____
- c) 25% OFF an item priced at \$200
Sale price = \$ _____
- d) 40% OFF an item priced at \$60
Sale price = \$ _____

5. Compare Unit Prices

Find the unit price (price per unit) and circle the better value.

- a) **Cereal A** \$4.80 for 600 g **Cereal B** \$5.70 for 750 g
Unit price A: \$ _____ per g Unit price B: \$ _____ per g
Better value: Cereal A ☐ Cereal B ☐
- b) **Chips A** \$3.20 for 160 g **Chips B** \$4.50 for 230 g
Unit price A: \$ _____ per g Unit price B: \$ _____ per g
Better value: Chips A ☐ Chips B ☐

6. Real-Life Shopping Problems

- a) A jacket is \$120 and is on sale for 25% off. What is the sale price?

Sale price = \$ _____

- b) You have \$100. A pair of shoes is \$85 and has 10% off. Do you have enough money to buy it? Show your working.

You have enough: Yes ☐ No ☐

- c) A TV is \$640. It is reduced by \$96. What percentage is this discount?
Discount = _____ %

7. Choose the Better Option

Tick (✓) the option that gives you the better value. Show your working if needed.

- a) Option A: 10% OFF a \$90 item ☐
Option B: \$12 OFF the same item ☐
- b) Option A: 20% OFF a \$75 item ☐
Option B: \$18 OFF the same item ☐
- c) Option A: Buy 3 for \$36 ☐
Option B: Buy 2 for \$28 (Same item) ☐
- d) Option A: 15% OFF a \$200 item ☐
Option B: \$25 OFF the same item ☐

8. Think and Explain

- a) Why is it important to compare prices before you buy?

- b) How can percentages help us make better shopping choices?

- c) When might a bigger discount not be the best deal? Give an example.

9. Plan a Shopping Budget

You have a budget of \$120. Choose THREE items to buy.

\$32	\$45	\$68	\$28	\$55	\$22

Item	Price	Spent
1.	\$ _____	\$ _____
2.	\$ _____	\$ _____
3.	\$ _____	\$ _____

Total spent: \$ _____

Money left: \$ _____

Did you stay within your budget? Yes ☐ No ☐

Learning Check

Colour the face that shows how you went.

I get it!

I'm getting there.

I need more help.

Parent / Teacher Observation

Your child can:

- ☐ Find percentages and discounts.
- ☐ Compare prices and find better value.
- ☐ Use unit prices to compare options.
- ☐ Solve shopping problems and make decisions.
- ☐ Explain their thinking using maths.

Notes: _____

Maths Words

percentage discount sale
compare value unit price
budget cost save
spend choice total

Great job!

You are learning to make smart shopping decisions with maths!

Remember!

Good choices today lead to smart savings tomorrow!

Compare prices

Check discounts

Look at unit prices

Plan your budget

Spend wisely

Save for goals

Well done!

You are becoming a smart shopper!
