

Use Fractions, Decimals, or Percentages in Proportional Comparison

Name: _____

Date: _____

Step 7

Elementary
(Grades 2–4)

Today I am learning to use fractions, decimals or percentages to compare quantities in proportion.

1. Match the Representations

Match each picture with the correct fraction, decimal and percentage.

	Picture	Fraction	Decimal	Percentage
a)		$\frac{3}{4}$	0.25	50%
b)		$\frac{1}{2}$	0.75	25%
c)		$\frac{1}{4}$	0.5	75%
d)		$\frac{2}{5}$	0.4	20%
e)		$\frac{1}{5}$	0.25	40%

2. Complete the Table

Use the given fraction to complete the table.

	Fraction	Decimal	Percentage
a)	$\frac{1}{2}$		
b)	$\frac{1}{4}$		
c)	$\frac{3}{5}$		
d)	$\frac{2}{5}$		
e)	$\frac{3}{4}$		

3. Compare Using Fractions, Decimals and Percentages

Compare the amounts and write >, < or = in each box.

- a) $\frac{1}{2}$ 0.4
- b) $\frac{3}{4}$ 70%
- c) 0.25 $\frac{1}{4}$
- d) 60% $\frac{2}{3}$
- e) 0.8 $\frac{4}{5}$

Tip!

Make the amounts the same type to compare.

$$\frac{1}{2} = 0.5 = 50\%$$

$$\frac{3}{4} = 0.75 = 75\%$$

4. Real-Life Examples

Write the part as a fraction, a decimal and a percentage.

- a) Ravi ate 2 of the 8 slices of pizza.

Fraction	Decimal	Percentage

- b) Mia drank 3 of the 5 glasses of juice.

Fraction	Decimal	Percentage

- c) The bar shows 32 out of 50 students.

Fraction	Decimal	Percentage

5. Solve the Problems

- a) A bag has 16 marbles. 12 are blue.

What fraction, decimal and percentage are blue?

Fraction	Decimal	Percentage

- b) A class read 24 books. 15 were fiction.

What fraction, decimal and percentage were fiction?

Fraction	Decimal	Percentage

- c) A recipe uses $\frac{3}{4}$ cup of sugar.

Write this as a decimal and a percentage.

Decimal	Percentage

- d) A garden has 80 flowers. 20% are roses.

How many flowers are roses?

flowers

6. Create and Compare

Create two different amounts that are equivalent.

Example: $\frac{1}{2} = 0.5 = 50\%$

- a) $\frac{1}{4} = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}\%$
- b) $0.6 = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}\%$
- c) $75\% = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Think!

There can be many ways to show the same amount.

7. Word Problem Challenge

At a school carnival, 200 people played a game.

- $\frac{1}{4}$ of the people won a prize.
- 0.3 of the people won a second prize.
- The rest did not win a prize.

- a) How many people won a prize? _____
- b) How many people won a second prize? _____
- c) What percentage of people did not win a prize? _____%

I can...

- ☐ use fractions to compare amounts.
- ☐ use decimals to compare amounts.
- ☐ use percentages to compare amounts.
- ☐ explain my thinking.

Key Conversions

Fraction	Decimal	Percentage	$\frac{1}{5}$	$\frac{2}{5}$
$\frac{1}{4}$	0.25	$\frac{3}{4}$	0.2	0.4
$\frac{1}{2}$	0.75	75%	0.4	40%

Great job!

You are using fractions, decimals and percentages to compare quantities like a mathematician!
