

Describe Simple Multiplicative Comparisons

Name: _____

Date: _____

Step 3

Early Elementary
(Grades 1–2)

Today I am learning to describe comparisons using words like more, less, times as many and as many as.

1. More or Less?

Look at each pair. Write how many more or how many less.

- a) There are _____ more cupcakes on the left.
- b) There are _____ less soccer balls on the right.
- c) There are _____ more apples on the left.
- d) There are _____ fewer stars on the left.

2. Times as Many

Look at each pair. Write how many times as many.

- a) There are _____ times as many fish on the right.
- b) There are _____ times as many flowers on the right.
- c) There are _____ times as many blocks on the right.
- d) There are _____ times as many cars on the right.

3. Complete the Table

Look at the first row. Then fill in the rest of the table.

Picture	How many in Group A?	How many in Group B?	B is how many times as many as A?	Write a sentence.
	2	6	3 times as many	Group B has 3 times as many as Group A.
a)			_____	Group B has _____ times as many as Group A.
b)			_____	Group B has _____ times as many as Group A.
c)			_____	Group B has _____ times as many as Group A.
d)			_____	Group B has _____ times as many as Group A.

4. Circle the Correct Words

Circle the words that make each sentence true.

- a) The jar on the right has more less the same marbles. It has 3 times 4 times as many.
- b) The group on the right has more less the same oranges. It has 2e 3ves 4 times as many.
- c) The group on the right has more less the same cubes. It has 2 times 3 times 4 times as many.
- d) The group on the right has more less the same balloons. It has 2 times 3 4 times as many.
- e) The group on the right has more less the same pencils. It has 2 times 3ve 4 times as many.

5. Word Problems

Read each problem. Draw a picture and write your answer.

- a) Liam has 2 toy trains. His brother has 4 toy trains.
How many times as many toy trains does his brother have?
Answer: _____
- b) Ava has 3 stickers. Her friend has 9 stickers.
How many times as many stickers does her friend have?
Answer: _____
- c) There are 5 red blocks and 10 blue blocks.
How many times as many blue blocks are there?
Answer: _____

6. Make Your Own

Make two groups of objects.

Then write a comparison sentence using times as many.

Group A	Group B

Write your sentence:

Group B has _____ times as many as Group A.

I can...

- ☐ compare groups using more, less and the same.
- ☐ use times as many to compare groups.
- ☐ solve simple problems with comparisons.
- ☐ explain my thinking.

Chance Words

Great job!

You are using math words to describe and compare with confidence!
